Squid ink blueberry cheesecake

WELCOME

Welcome to the UMKC School of Medicine 50th Anniversary Golden Jubilee! From breaking ground to ground breaking, we have had an incredible first 50 years. We are thrilled to have you here to celebrate this landmark anniversary and help us usher in the next 50 years as we continue to educate, innovate and pioneer new treatments with our partners at the Health Sciences District.

In this ever-changing health care environment, we are leading the way in preparing physicians. From its inception, the School of Medicine dared to change medical education. Our impressive alumni work at physician practices and top academic institutions across the United States and are shining examples of our success.

Our dedicated physicians and teachers, like our partners at the Health Sciences District, are committed to the mission of caring for our community, especially the underserved. A commitment to research is quickly elevating UMKC to status as a significant research institution. We are excited for the future, where we will continue to thrive as an academic medical center and as a preeminent Midwest medical institution.

Thanks to you and our generous sponsors for supporting the UMKC School of Medicine, its continuing efforts in training the next generation of health care providers, and its 50th Anniversary Golden Jubilee!

Enjoy the evening!

Dr. Nelson and Rachael Sabates
Co-Chairs

Charlie and the Honorable Brenda Shields
Honorary Co-Chairs

LETTER FROM THE DEAN

After our first 50 years, it is safe to say our success has always been grounded in admitting the best, brightest, most diverse group of students, while recruiting the best, brightest, most diverse faculty and continuing to innovate and build on the foundations of our school's pioneering history.

Today's blueprint is aligned with the vision of our founders: to graduate students and residents to meet our mission of creating the health care workforce of the future. Our footprint extends from Kansas City to our campus at Mosaic Life Care in St. Joseph, Missouri. Fueled by more legislative funding, with the hope of private and public partnerships, we look forward to continued growth. Plans are underway for breaking ground in St. Joseph for a state-of-the-art facility for our rural initiative, as well as a proposed new medical and dental building in the Health Sciences District. With these new facilities, we will continue to meet our goal of improving the health and well-being of all Missourians.

We have incredible momentum to move forward through our next 50 years. Our faculty and more than 4,000 alumni are heads of academic departments, quality and patient safety leaders, medical curricular innovators and are conducting state-of-the-art research. Our graduates continue to excel and are regarded as top clinicians and educators.

Our future is unlimited. "From Breaking Ground to Ground Breaking" is a fitting theme for our 50th Anniversary Jubilee as we honor our past, celebrate our present and rejoice in our future.

Mary Anne Jackson, M.D., '78
Dean, School of Medicine
